

LEVEL THE PLAYING FIELD —

They've had CR tech for *years*. Now it's your turn.

Manheim, AVV, and CarMax run drive-through capture on their own platforms. We bring the same advantage to independent auctions — multi-angle 4K video published straight to your listing pages, plus optional engine audio when you choose to share it.

NOW AVAILABLE ON
YOUR AUCTION'S WEBSITE

2.5x

More likely to sell online with detailed condition media

MANHEIM, 2018

22.3%

Conversion lift for sight-unseen listings that include video

EBAY MOTORS

60%+

Of major auction attendance already happens remotely

MANHEIM, 2019

THE PROCESS

Measured in seconds, *not minutes*.

1

Drive through

WHAT'S IN THE SYSTEM

2

Smart Vehicle ID

3

Video captured

4

Live on your site

Built for a lane, not a *photo studio*.

ID

Automatic Vehicle ID

Reads the run number off the windshield tag as the vehicle passes.

4K

Multi-Angle 4K Video

Full vehicle coverage in a single pass. Stills extracted from frames.

▼

Undercarriage OPTIONAL

Upward-facing floor camera — exhaust, leaks, frame integrity.

♪

Stereo Engine Audio OPTIONAL

Buyers hear which side a noise is coming from — not just that there is one.

↺

Smart Re-Runs

Re-runs reuse the prior capture automatically — you aren't charged twice.

☰

Inventory Integration

Pre-matches every vehicle against your existing IMS. No re-keying.
